

## Cirv Inc. Case Study: City Bible Church Online Giving

citybiblechurch.org

### Creation:

City Bible was using Pay Pal to offer members a way to tithe online. Cirv sat down with City Bible and mutually decided their is a better way.

### Innovation:

One of the requirements was to get rid of a user-name and password. Cirv and City Bible came up with one page solution where a member can give their tithes and select other areas to give to in one step. Behind the scenes is a reporting engine that helps tie into their accounting system.

### Relation:

City Bible has used Cirv since 2003 and continues to use us as a resource for Intranet and Website initiatives.

### Vision:

Cirv offers City Bible ways to help increase visibility on their website and develop tools for their ministries and members.

### PROCESSES:

7-Phase - Optimize - Capitalize

### SERVICES:

Web Apps  
Commerce

### City Bible:

A church that has over forty years of growth and is know around the world.
